

PRESS RELEASE

RDS, the onboard weighing supplier of choice for the UK quarry market.

RDS have become the partner to many of the leading UK quarry companies. The reason for this success is not down to one factor but a number of very important factors.

Support: exclusive RDS distributors only support RDS products. These specialists are factory trained and ONLY fit RDS manufactured products, the company does not use sub contractors.

Product: The RDS product range is the most extensive in the market today. RDS produce products to suit all budgets and meet all requirements. From easy to fit single sensor-weighing systems to OIML trade approved, telemetry weighing systems, RDS has everything the customer may require.

Technology: The company is a leader in the use of new technology and has never been afraid to make sure that its products are the most advanced in the field.

RDS did not become the market leader overnight; the company has been established for over 35 years and has a wealth of experience. The company supplies products to many major OEMs and also has arguably the most extensive and successful distributor chain of any manufacturer.

The future will bring even more innovation, and RDS will continue to lead the field in the design and development of all of its products.

RDS Technology Ltd - leading hydraulic weighing technology into the 21st Century
