

RDS shows **WEIGHLOG α 10** on-board weighing system at Cereals 2017

Minchinhampton, 23rd March 2017

At Cereals 2017, RDS Technology Ltd. will exhibit its range of on-board weighing scales including the **WEIGHLOG α 10**, which has been specifically designed for agricultural loaders.

The **WEIGHLOG α 10** incorporates a 4.3" colour, sunlight-readable touchscreen display and additional physical keys and is designed to be a user-friendly on-board weighing system for trailer & hopper loading, batch blending or check weighing.

Suitable for use with up to 10 different attachments e.g. buckets or forks, the system is designed to be retrofitted onto compact wheeled loaders, telescopic handlers, forklifts, skidsteer type loaders and tractor loaders.

The system measures hydraulic pressure using up to four sensors at a certain position on the lifting cycle, compensating for pressure changes in the system.

Enhanced stores capability comprising 30 products, 30 customers and up to five different recipes designed around animal feed mixing, dispensing and grain handling enables accurate record keeping and traceability.

The system is designed to provide communication and data storage via SD card reader and USB 2.0 host allowing quick, safe and efficient uploading and downloading of data.

Also on show will be the **Combine Moisture Meter 100**.

Using the same moisture sensor technology as the RDS Ceres yield monitor, the Combine Moisture Meter 100 is designed to eliminate the need to make regular stops during harvesting to

test grain moisture content and to help quickly identify if conditions are, or are becoming, unsuitable for combining.

RDS Technology Ltd will also exhibit its range of monitoring and measuring instruments for farming applications including the Artemis variable rate seed drill control system, Ceres 8000i yield monitor system for combines, and Delta 34i and Spraymaster 200 sprayer regulation and control systems.

Additional information will be available at the RDS Technology stand **326** and online at rdstec.com.
