A weighing system with 0.5% accuracy designed specifically for forklift trucks operating in the fastest loading environments.

With the ever increasing focus on productivity and safe-loading, the new LIFTLOG 1000 is a cost-effective weighing instrument that reduces loading cycle times and maximises tons per hour performance.

www.rdstec.com
The RDS LIFTLOG 1000 is an operator friendly product that has been specifically designed for use on forklift trucks working in a despatch yard or warehouse environment. Weighing on the forklift removes the need to travel to a static floor scale often remotely located from the stock location or loading bay. Loading correctly first time eradicates return trips to the stockpile reducing vehicle movement, fuel usage, machine and tyre wear.

Using a sensor to measure hydraulic pressure controlled in a drop valve, the LIFTLOG 1000 informs the operator of load as a 'calculated' weight in Tonnes, kgs, lbs and US Tons. This load can then be confirmed automatically or via the 'Enter' button and added to the Accumulated total and will also be added to the Grand total. In addition, when approaching and at the point of overload, an internal (and optional external) alarm will sound to further inform the operator of load status. Approximate load is indicated via an on-screen Load bar.

The LIFTLOG 1000 uses a 4.3” colour, hi-brightness resistive touchscreen display and additional physical keys providing a modern and ergonomic interface. The system can be retrofitted onto all types of forklift.

**FEATURES**

- **ADDITIONS**
  - Accuracy +/- 0.5% of truck capacity. Correctly load vehicles or stock check.
  - Colour touchscreen display. Clear, uncluttered display provides intuitive operation.
  - Store up to 50 tare values. Pre-determined pallet and stillage weights for faster operation.
  - Grand total summary. Total weight and weighing cycles over time.
  - Automatic total accumulation. Speeds lift cycle.
  - Stores function. Save load/lift totals against a total of 100 named memory stores, consisting of up to 1400 lift which can be given an independent ID reference.
  - Communication via SD card and USB. Safe & efficient data handling for transfer of stored data to and from office or added external data storage.
  - 2 serial output ports. Supports ICP 300 printer option or communication to PC or Modem using csv or xml file format.
  - Calibration ‘Nudge’. Quick and easy calibration adjustment to match site reference. Pin code protect option.
  - Internal audible alarm + load indication bar. Set alarm at approach and at overload threshold to increase site safety. Colour coded load bar provides clear current load indication.
  - Overload and logging. Stores time and date of last 10 overloads identifying operators and forklifts at risk. Pin code protected.
  - Quick and easy installation & calibration. Nationwide service and back up from RDS distributors.
  - Pressure based technology. Maintains accuracy minimising machine downtime for servicing or repair. Maintains lifting capacity and driver visibility.
LIFTLOG 1000

QUICK REFERENCE GUIDE

2 FUNCTION DISPLAY
Lift Weight: Up to 5 digits. Pressing these digits gains access to the “Grand Total”.

Accumulated Net or Gross Total
Up to 6 digits. Touch region to alternate.

Preset Tare
Unit

Manual Tare
Shows list of up to 50 pre-programmed TARE values. Also enables manual entry of a Preset TARE value.

Auto Tare
Allows Taring of current load on forks.

Height Reference Sensor
Switched ("OK")

Overload Bar Graph

Weigh Button
Initialises weighing cycle. (Duplicated using optional Remote Weigh Button)

Store Group Selection Button and Text Name
Selecting enters to list of 100 stores.

Power Switch
Press and hold to switch off.

Home
Returns to the main weighing screen from any menu.

System Menu
Entry into the Instrument setup or calibration levels.

Light Sensor
Auto detection of screen brightness and contrast.

Data LED
Flashes when exporting data to the SD or USB.

Escape
Undo function in set up mode. Also subtracts last calculated lift on main screen.

Enter
Enter confirmation key manually adding loads.

System Enhancements
External audible alarm for use in noisy environments. A variety are available dependent on application.
Remote weigh button.
Remote enter button.
Compatible with RDS iSOSYNC PC software.

Technical Details
Operating voltage: 12 Vdc
Sensor range: 0 - 250 bar
Temperature range: -20 to +50°C operating
System accuracy: +/- 0.5% of truck capacity
Warranty: 1 year
Environmental unit protection: Instrument protection IP54 Full RF/EMI Sensor & valve IP67

Also in the Range
LIFTLOG 100(+) for on-board check weighing and load monitoring
Speed & Distance 200 for forklift speed and distance monitoring and speed limit alarms.
