

## **Technician (Engineering) November 2018**

Topcon Technology is looking for a Technician to join our Engineering team based Minchinhampton. This is a unique role which supports engineering activities such as design, test, check-out, modification and assembly of prototype but also provide support at shows with the setup of our products and equipment.

This is a varied role and the main duties and responsibilities for the role include:

- Responsible for electronic and mechanical hardware assembly and prototype wiring.
- Works from schematics, diagrams, written and verbal descriptions, layouts or defined plans to perform testing, checkout and trouble-shooting functions.
- Perform operational test and fault isolation on systems and equipment.
- Assists in determining methods or actions to remedy malfunctions at testing stage.
- Writing and performing system test cases, logging and reporting results back in to Engineering and Test departments.
- Provide marketing support for UK and European shows, so travel will be required.
- Participate in continuous improvement activities.

Applicants should be able to demonstrate to required experience, skill and knowledge listed below.

- Previous experience of working within a similar Technician role is essential and from within a similar electro-mechanical manufacturing environment would be an advantage.
- Experience in the handling of electronic assemblies (ESD, EOS, safe handling).
- Level 3 BTEC or equivalent in Engineering or similar subjects, or relevant experience.
- Competence in the navigation of circuit diagrams and assembly drawings.
- A methodical and logical approach to work.
- Strong problem-solving skills.
- Good verbal and written communication skills.
- Ability to prioritise and work on own initiative.
- A full UK driver's license and ability to travel.

This is a permanent, full time (37.5 hours a week) role.
