RDS shows **LOADMASTER α50** at SCOTPLANT 2018

Minchinhampton, March 2018

On show for visitors to Scotplant 2018 on the RDS Technology stand will be the **LOADMASTER α50**, **LOADEX 100**, **LOADMASTER α100**, **iSO SYNC** and **WEIGHLOG α10**.

LOADMASTER α50, the enhanced colour touchscreen replacement for the **LOADMASTER 8kiX** is an on-board weighing system designed for larger loaders. The **LOADMASTER α50** is designed to help increase loading efficiency, cut vehicle movements on site and ensure lorries are correctly loaded first time.

LOADEX 100 is a retrofittable scale installed on both tracked and wheeled 360 degree excavators and material handling machines to weigh the amount of material in the bucket, grab or clamshell.

LOADMASTER α100 is an on-board weighing scale for wheeled loaders. A CAN based system combining cutting edge sensor technology and signal processing techniques, the **LOADMASTER α100** is designed to provide precise and consistent bucket weight information and to emphasise the gains in productivity and profitability that can be achieved with such technology.

LOADMASTER α100 is designed to operate within the fastest loading environments and toughest of conditions, to reduce cycle times and maximise tons per hour performance. **iSO SYNC** enables control of the loadout operation and inventory, productivity & traceability management.

The software can be used with either **LOADMASTER α100** or **LOADEX 100** and allows the rapid transfer of job information from a central computer to the loader or excavator and the resultant load information is sent back to the PC upon completion.

RDS TECHNOLOGY

For smaller loaders and skid-steers, RDS offers the **WEIGHLOG α 10**, which also benefits from a colour touch screen display. This instrument is designed to be a user friendly on-board weighing system which provides accurate and consistent bucket and total load results, meaning stock management and check-weighing operations can be controlled more effectively.

Additional information will be available at the RDS Technology stand and online at rdstec.com.
